

Christopher Jagoda

chrisjagoda@live.com | 973-934-8074 | <https://chrisjagoda.com> | Montclair, NJ

- Avid software developer with over three years experience contributing to the open source community.
- Able to quickly learn and master new technologies, equally successful in both team and self-directed settings and proficient in multiple operating systems, programming languages, tools, and testing methodologies.
- Well versed in test-driven development, good programming practices, data structures and algorithms, asynchronous/concurrent programming techniques, version control, and multiple SDLC models.

Education

Montclair State University

Montclair, NJ

B.S. Computer Science - May 2018

3.2 GPA

Employment

Software Engineer Intern - Advanced System Concepts

Morristown, NJ (5/15/17 - 9/1/17)

C#, Typescript, HTML, CSS, SQL, Powershell, .NET, Nodejs, Angular, SQL Server, TFS, Git, Visual Studio

Worked on a scrum team developing a full stack in-house software tool to improve communication and productivity among developers.

Developed frontend architecture utilizing latest technologies and development practices and wrote nodejs scripts to automate front-end build processes and tests.

Wrote REST endpoints and stored procedures to store and retrieve data and worked with various windows APIs.

Freelance Web Development

(2014 - Present)

Javascript, jQuery, Python, Django, HTML, CSS, SASS, Bootstrap, SQL, MySQL, Postgres, Redis

Worked with several content management systems designing, creating, and monitoring websites, connecting databases to websites, and database administration.

Projects - <https://github.com/chrisjagoda>

SVM Music Genre Classifier

Python, Flask, sklearn, tensorflow, librosa, matplotlib, numpy, pandas

Trained support vector machine learning model to recognize the genre of a given piece of music.

Improved model accuracy by performing data analysis on results to determine key features in each genre to improve model training. Developed web interface to upload songs and return the predicted genre.

Mesh Network Messaging App

Java, Kotlin, Android

Lead developer on a team of four for a senior year Software Engineering project.

Led team in app development following team written design document.

Contributed to development of test plan, wrote tests, and assisted quality assurance in writing tests.

Crypto Market Price Analyzer

Python, Flask, numpy, pandas, Google Cloud Platform

A command line utility for retrieving up to date cryptocurrency prices and information from an online cryptocurrency market price aggregator.

Performs linear regression analysis on data and writes results to a google sheet with recommendations on when to buy and sell.
